

## BIG BAG TUBULAR 1-2 LIFTING POINTS

The Tubular big bag has no vertical seams because it is realized with circular looms. For this reason it guarantees more protection from humidity or outflow of powders and granular materials. This model is particularly effective for packing fertilizers due to the easy lifting system. It is available with one or two lifting points.

### KEY INDUSTRIES

Mining

Chemicals

Agriculture

### SAFE WORKING LOAD

+ From 500 kg up to 2000 kg

### CERTIFICATIONS

+ UN Group II and II

+ ISO 22000

### ACCESSORIES

- + Liner
